Select menus are a common choice for date pickers since they're easy to set up.. I've scoured the web in search of the best plugins and organized them all in this post.

1. [popcalendar](#)
2. [popcalendarxp](#)
3. [popcalendar.js error](#)

You'll find vanilla JS plugins, jQuery plugins, and even extensions for frameworks.

popcalendar

popcalendar, popcalendar.js example, popcalendarxp, popcalendar.js download, popcalendar.js error, popcalendar javascript, popcalendar xp exploit, popcalendar app store, popcalendar mac download, rjs popcalendar, popcalendar xp range [Screencast Download For Mac](#)

Once you learn the basic setup process, you'll never go back, so it's really just a matter of finding a good one.. But after decades of MM/DD/YY menus, I think our users deserve better It's pretty simple to add a date picker to your form, and most date picker plugins are totally free.
